

RoHS Statement 01/03/2018

The European Union (EU) Directive 2011/65/EU referred to as “The Restriction of Hazardous Substances (RoHS)” was established in an effort to protect human health and the environment from certain hazardous contaminants. The directive states that as of June 8th 2011 products supplied do not contain more than the maximum permitted levels of Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyl and Polybrominated Diphenyl ethers.

Fastener Consultant Inc. would like to assure that as of January 3, 2018, all of our raw material, steel, stainless, brass, aluminum, nylon, Teflon, and phenolic are all in compliance with the Directive.

Fastener Consultant Inc. will continue to monitor all European Union Directives to ensure compliance going forward

Anthony Manno

President
